

Project Engineer Vacancy

Our offer

Are you a civil engineer, ready for the next big challenge? Then we got the job for you!

We offer a start of an international career in the construction industry by the means of an eight months job in Belgium. In addition we provide training and development program within a professional environment, possibilities to expand your horizon and work on some iconic projects shaping the skylines and defining the image of the future.

If after the first eight months the evaluation of your program is positive, there is a possibility to start working for one of BESIX' local branches or on one of our project sites in your home region.

Your role

For our department international civil, marine and water works, we are looking for a project engineer:

- You are in Belgium for 8 months.
- You work in BESIX Head Office for 6 months in the department International Civil, Marine and Water Works. You work with a team to acquire new contracts. Your input concerns mainly methods, planning, procurement and logistics. You participate in meetings with clients, suppliers and subcontractors.
- You work for two months on one of BESIX' Belgian sites. You assist in all logistical arrangements on site.

Your Profile

- You are a civil engineer or equal by experience.
- You are highly interested in civil, marine and water works.
- You are fluent in English (and French).
- You have a first working experience in the construction industry.
- You are interested in working in the office and on site.
- You identify with our core competencies by possessing an entrepreneurial mind, showing flexibility, being innovative and result-oriented while promoting teamwork.
- You equally possess excellent communication skills, an analytical mind and you are client focused.
- You work proactive and do not hesitate to contact your internal and external network to achieve your goals.
- You are internationally oriented and are willing to travel for your job.
- You are eligible to the program (younger than 30 years old and is possession of a master degree)

How to apply

Please submit your motivational letter and CV with list of references and contacts to karel.uyttendaele@pandora.be
